

Guidelines for the preparation of proposals for the KCORC Scholarship

The following table provides a template that should be followed when preparing proposals for the KCORC Scholarship. The Scholarship committee reserves the right to reject any applications that do not adhere to these guidelines.

Summary/motivation (~500 words)	Executive summary of the project, including background, problem statement, and overarching goals.
Description of research context and project main objectives (~500 words)	Research context must be clarified in brief by also providing meaningful references. Objectives should be meaningful and realistic given the timeframe of the project.
Description of work programme including Gantt chart/workplan (~1000 words)	Summary of the proposed work programme, divided into suitable tasks or work packages as appropriate. This section should clearly describe the methodology and tools that will be used, the duration of tasks and the expertise provided by the host institution. Suitable figures can be included to emphasise important points.
Outputs and deliverables (~250 words)	Expected scientific outputs and deliverables from the project. This could include planned conference or journal publications, a set of experimental data, or the development and deployment of software tools as examples.
Anticipated impact on applicant and host institution (~250 words)	Summarise how the project will benefit the career of the applicant, and any potential benefits for the host institution. Are there any expected follow-on activities that could nurture a long-lasting collaboration
Budget and justification of resources	Itemised list of all budget items in a table, including a clear justification for the amount requested
References	References should be relevant and show that the applicant is up to date with the latest developments in the area related to the proposal.
